## ABOUT DAE

Dog-Abilities was founded in October 2011 by dog trainer Dae Grodin. Dae graduated from the University of Kentucky with a degree in psychology and has been involved within the canine industry for 11 years, working in dog daycare, training, and boarding facilities. She utilizes positive reinforcement and scientific-based methods in her training. She feels these techniques provide a wonderful way to bridge relationships and learning among both students and dogs alike.

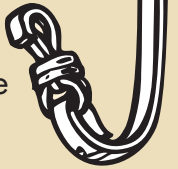

Dae currently lives with three dogs and a house bunny. She enjoys various activities with all of them, including Search and Rescue work, fun nose work games, running, hiking, and trick training.

We are committed to providing excellent professional service and ample time for consultations, customized training plans, and follow-up sessions.

## TRAINING PHILOSOPHY

Dog-Abilities only uses force-free, gentle guidance techniques. We believe that training is built on a trusting relationship between the owner and their pet. Our goal is to help you achieve the desired results with your pet, whether it is for developing basic pet manners, finding a solution for a behavioral issue, or to further explore other dog activities.
